Software Engineering

The Year 11 Course

About the course

The study of HSC Software Engineering enables students to develop an understanding of the fundamentals of computer science. Students will develop knowledge and understanding of software engineering, hardware and software integration, and the development, implementation and evaluation of computer programs. The course is recommended for students looking to pursue further study in computer science and related fields.

Due for release Term 1 2024

To enable teachers to plan for implementation in 2024 we will release free digital chapters and other free resources progressively throughout 2023.
